- Redux State management

Projects

School management system for Remkay Schools

I was hired to build a management system for Remkay Schools, the job was given to me by the school's director. The project manager gave me all necessary files and documents needed. I started the job and completed it after 2 months, I gave the school the job and they were satisfied with the job done although we made some corrections. But they were satisfied.

Voting Portal as a Final year project for a Final year student in Fountain University

I was hired by a final year student to create a voting portal where the university voting activities can take place, the university intend using the portal so they gave their layout and preferences to the student and I have to meet my client's satisfaction. I started the job, the school's preference was harder than I first thought, I wasn't explained to well, after the first completion, they gave their list of corrections, the corrections was almost like recreating the site, but I was able to complete the job with the time frame of 2 months. The client was also satisfied.

Blog project by me, A personal project

I am currently building a blog, this blog will possess great features and access with full security. This blog will have competitors such as Facebook. It is a personal project with all hands on deck

Frontend developer for a reputable housing organization in Nigeria (PropertyCo)

I am currently working on the official webpage for the housing organization PropertyCo, where knowledge from both Backend and Frontend is being used, My main task is to interpret and convert designs from the design team to a webpage.
